MESA Acquires Bass Engineering

TULSA, Okla. – MESA is excited to announce the acquisition of Bass Engineering, based in Longview, Texas, effective January 1, 2022. Bass Engineering has been in business since 1967 and has developed a reputation as subject matter experts in cathodic protection and corrosion control. Their customer-centric philosophy results in a solutions-oriented approach to providing reliable corrosion control across the country. With services ranging from technical surveys, integrity management, cathodic protection installation, and tank protection, the Bass Engineering team is prepared to protect your essential infrastructure assets.

Clay Brelsford will remain President of Bass Engineering. Clay has been in the corrosion business for his entire professional career and is passionate about growing future leaders in the industry. Bass Engineering and MESA share a mutual desire to make the world a SAFER place and plan to integrate operations in a way that strengthens both brands.

MESA's priority continues to be providing an exceptional customer experience while keeping our teams and our communities SAFE. Both MESA and Bass Engineering look forward to a bright future of protecting assets and protecting the planet.
